Outline

- Objective
- Working Procedure
- Project User Interface
- Input Out Demo
- Expected Outcomes
- Conclusion

Objective

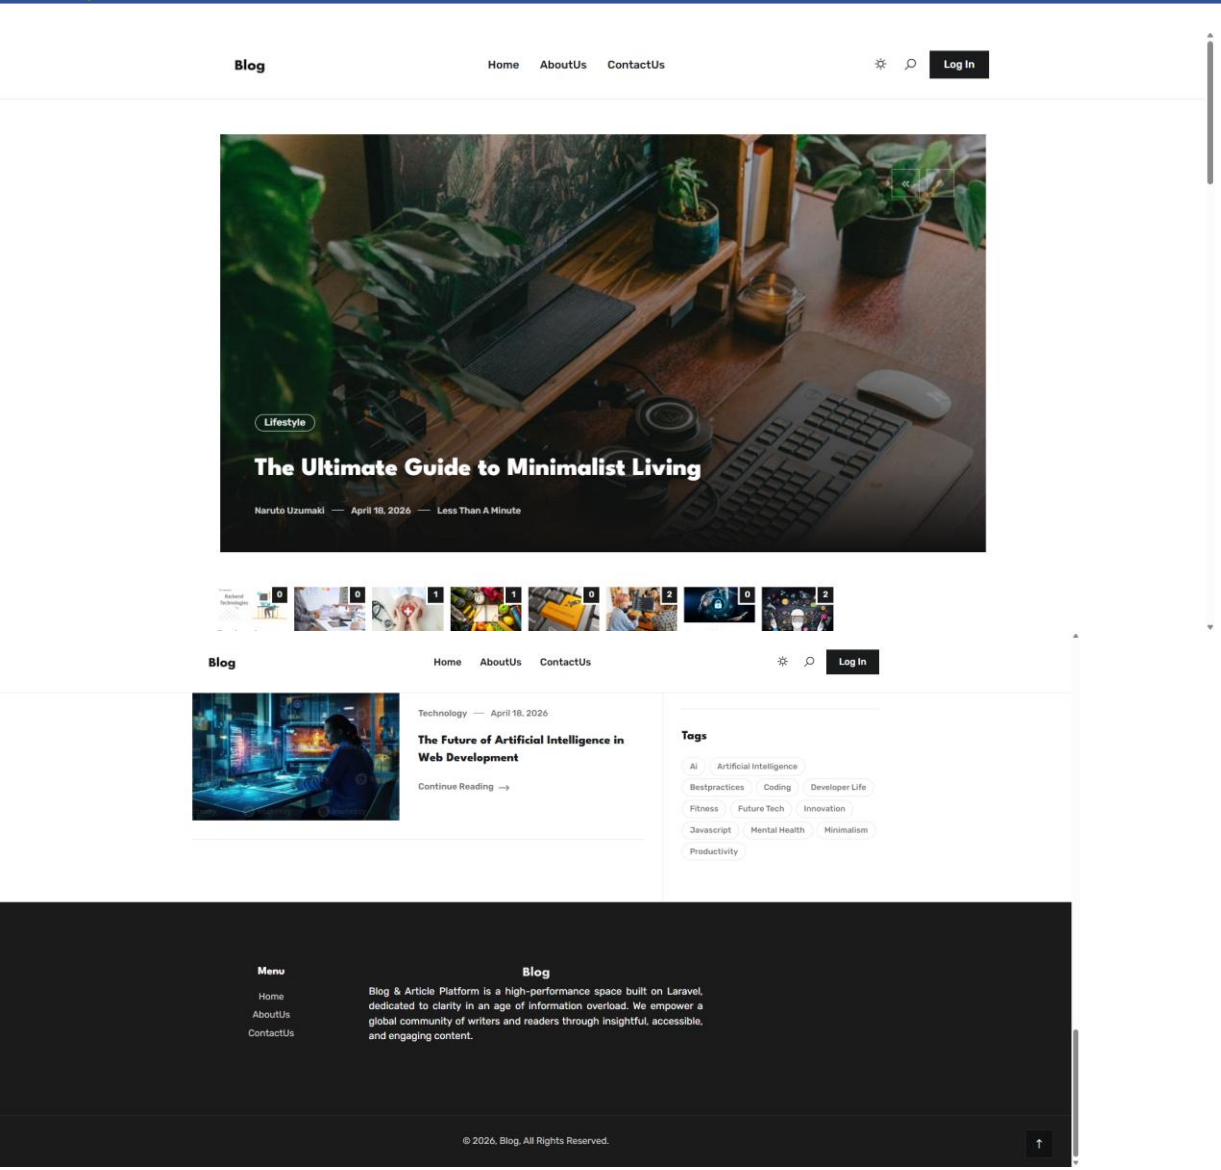
Objectives of this Project

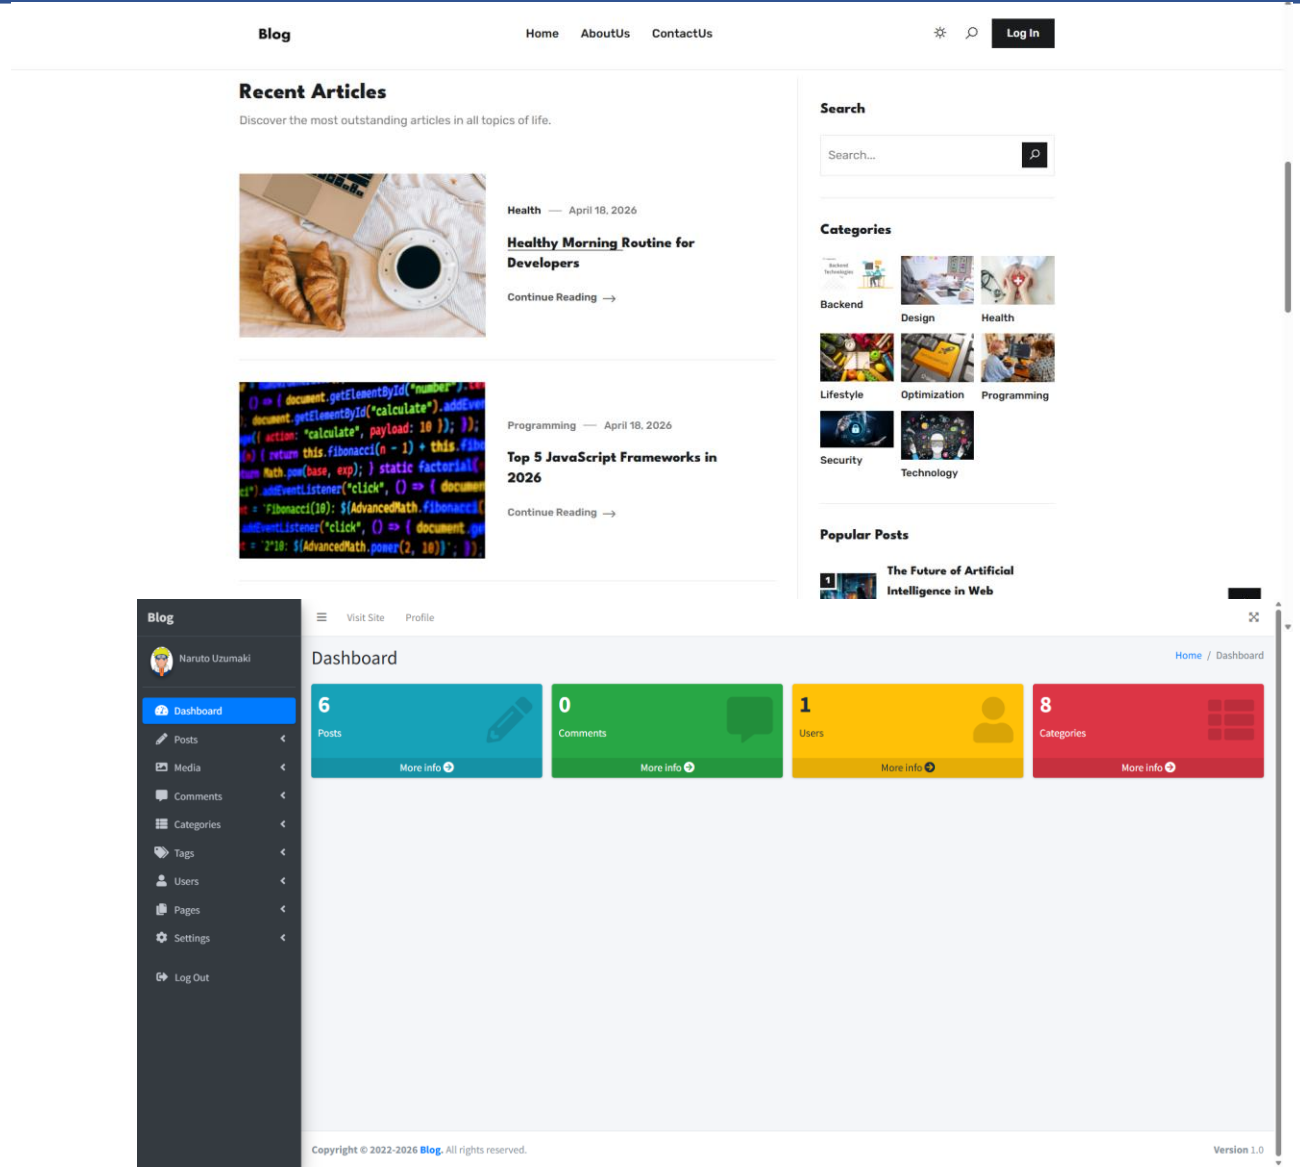
- Develop a multi-user blogging platform
- Allow users to create, edit and manage posts
- Implement Admin, Author and Visitor roles
- Enable commenting and content categorization
- Provide secure and user-friendly content management

Working Procedure

System Workflow
Step 1: User Registration/Login
Step 2: Author creates blog post
Step 3: Post stored in database
Step 4: Admin manages users, comments and content
Step 5: Visitors read and comment on posts
Technology Used:
•Laravel 10
•PHP 8.1
•MySQL
•Blade Templates
•MVC Architecture

Project User Interface





Input Out Demo

Expected Outcomes

- Functional blogging platform
- Role-based access control
- Secure content management
- Organized posts with categories and tags
- Interactive comment system
- Easy scalability for future improvements

Conclusion

- Successfully developed a multi-user blog platform.
- Implemented core blogging features.
- Used Laravel MVC structure effectively.
- System is secure, maintainable and expandable.

Thank You
